Hey NJ Families!

Apply for Free School Meals

Every child should have the opportunity to feel healthy, strong, and ready to learn. Applying for free lunch in New Jersey is one more way to provide your child with a delicious, healthy meal they can count on.

Your application is safe and confidential. If you are applying for residency, completing this application will not affect the process.

[LEARN MORE](#)

Free School Meals Eligibility:

- All children in households receiving benefits from NJ SNAP or NJ TANF/WorkFirst-NJ are eligible for free meals.
- Foster children that are under the legal responsibility of a foster care agency or court are eligible for free meals.
- Children participating in their school's Head Start program are eligible for free meals.
- Children who meet the definition of homeless, runaway, or migrant are eligible for free meals.
- Children may be eligible if your household's income is within the limits on the New Jersey Expanded Income Guidelines. See below to check your eligibility.

With the new expanded income guidelines, your family may be eligible to receive school lunches at no cost.

New Jersey Expanded Income Guidelines (NJEIE)

Effective: July 1, 2024 to June 30, 2025

Household Size	Annual	Monthly	Twice Per Month	Every Two Weeks	Weekly
1	\$33,735	\$2,812	\$1,406	\$1,298	\$649
2	\$45,786	\$3,816	\$1,908	\$1,761	\$881
3	\$57,837	\$4,820	\$2,410	\$2,225	\$1,113
4	\$69,888	\$5,824	\$2,912	\$2,688	\$1,344
5	\$81,940	\$6,829	\$3,415	\$3,152	\$1,576
6	\$93,991	\$7,833	\$3,917	\$3,616	\$1,808
7	\$106,042	\$8,837	\$4,419	\$4,079	\$2,040
8	\$118,093	\$9,842	\$4,921	\$4,543	\$2,272
Each additional household member add	\$12,052	\$1,005	\$503	\$464	\$232

If you have questions about your eligibility, would like to complete an application or make changes to a previously filed application, contact your child's school.

USDA Nondiscrimination Statement

In accordance with federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, this institution is prohibited from discriminating on the basis of race, color, national origin, sex (including gender identity and sexual orientation), religious creed, disability, age, political beliefs, or reprisal or retaliation for prior civil rights activity.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (e.g., Braille, large print, audiotope, American Sign Language) should contact the agency (state or local) where they applied for benefits. Individuals who are deaf, hard of hearing or have speech disabilities may contact USDA through the Federal Relay Service at 800-877-8339.

To file a program discrimination complaint, a Complainant should complete a Form AD-3027, USDA Program v Complaint Form, which can be obtained online at <https://www.usda.gov/sites/default/files/documents/USDA-OASCR%20P-Complaint-Form-0508-0002-508-11-28-17Fox2Mail.pdf>, from any USDA office, by calling 833-620-1071 or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD-3027 form or letter must be submitted to:

1. Mail

Food and Nutrition Service, USDA
1320 Braddock Place, Room 334
Alexandria, VA 22314

2. Fax

833-256-1665 or
202-690-7442

Need Help Paying for Groceries?

New Jersey's Supplemental Nutrition Assistance Program (SNAP) provides food assistance to individuals and families with low incomes. You can use your SNAP benefits to buy groceries in most food retail stores and some farmer's markets — stretching your food budget!

If you are eligible, you will receive at least \$95 a month for food shopping.

How do I know if I'm eligible?

Your household (anyone who lives and eats together in your home) must meet certain requirements to be eligible for SNAP, including meeting the maximum allowable income.

Household Size	Maximum Allowable Income*
1	\$2,322
2	\$3,152
3	\$3,981
4	\$4,810
Each Additional	+ \$830

*Figures valid October 2024 - September 2025

Meeting the maximum allowable income for your household size does not guarantee you are eligible for SNAP.

How do I apply?

You can apply online at MyNJHelps.gov or at your County Social Service Agency (CSSA). When you apply for SNAP, you also can indicate if you want to apply for WFNJ and child care.

SNAP has partnered with several agencies called Navigators who can answer questions and help you apply. Visit NJSNAPNavigators.gov.

If I am eligible, how much would I receive?

The amount you receive depends on your situation, such as the number of people in your household, your income and the number of deductions that apply to you.

New Jersey has a minimum monthly SNAP benefit amount of \$95. If you apply for SNAP and are approved to receive the federal minimum payment or any amount less than \$95, New Jersey will make up the difference.

How do I receive my benefits?

Benefits are issued on a Families First Electronic Benefits Transfer (EBT) card that works like a debit card. This card can be used in most grocery stores, some farmer's markets and online.

A word about fraud

Be aware that there are other agencies that might claim to be "SNAP consultants," asking you for personal information to complete a pre-approved SNAP application or telling you that an application was initiated on your behalf. If you think a letter or text is a scam, do not reply. If you do not know if a request for personal information is real, contact your CSSA.

You should never be asked to pay to fill out an application. There is no charge.

Additional resources are available

If you are approved for SNAP, you would likely be eligible for the Low Income Home Energy Assistance Program (LIHEAP), Supplemental Nutrition Program for Women, Infants and Children (WIC), and free or reduced-price school meals.

You can find information on these programs and other support services on the NJSNAP.gov "Resources" page.

Preventing Mosquito-borne Diseases

- Use EPA-registered insect repellent.
 - Do not use repellent on children younger than two months.
- Treat your clothing with permethrin or buy pre-treated clothing.
- Mosquito-proof your yard and home by dumping standing water and using well maintained window and door screens.
- Wear long-sleeved shirts and long pants.
- Cover crib, stroller, and baby carrier with mosquito netting.
- There are no vaccines to prevent mosquito-borne diseases transmitted in New Jersey. Talk to your health care provider about vaccines and antimalarials you can take to prevent travel-associated mosquito-borne diseases.

For More Information

For more information on mosquito-borne diseases, educational resources, travel health resources, and data on mosquito-borne diseases, visit FighttheBite.NJ.gov.

Mosquito-Borne DISEASES

Fight the Bite!

Learn how to prevent mosquito bites and the diseases they spread.

NJHealth
New Jersey Department of Health

What are Mosquito-borne Diseases?

Mosquito-borne diseases are illnesses that are spread to humans by the bite of an infected mosquito. In New Jersey, the most common mosquito-borne diseases people can get from local mosquitoes are:

- West Nile virus
- Eastern equine encephalitis
- Jamestown Canyon virus

How Do These Diseases Spread?

Mosquitoes become infected when they feed on birds or mammals carrying the disease germ. Infected mosquitoes can then spread the disease to people and other animals such as horses. People and horses are considered "dead-end" hosts and don't pass along germs to other biting mosquitoes.

Travel-Associated Diseases

- Chikungunya
- Oropouche*
- Dengue
- Yellow Fever
- Malaria
- Zika

Avoid mosquito bites for three weeks after overseas travel to prevent the spread of travel-associated diseases to mosquitoes in New Jersey, which may then infect other people.

** Oropouche is transmitted primarily by biting midges, but has also been associated with mosquitoes.*

Symptoms

Many people infected with a mosquito-borne disease have no symptoms or mild symptoms. Symptoms typically appear 2-14 days after being bit by an infected mosquito.

Common Symptoms

- Fever
- Chills
- Headache
- Nausea
- Vomiting
- Joint pain
- Body aches
- Rash

Severe Illness

Severe illness can occur, but it is rare. Symptoms may include:

- High fever
- Stiff neck
- Seizures
- Confusion
- Coma
- Paralysis
- Heavy bleeding
- Brain swelling
- Jaundice

Diagnosis

Visit a health care provider if you develop symptoms and mention recent travel and outdoor activities.

Who Can Get a Mosquito-borne Disease?

Anyone can get a mosquito-borne disease, but people who spend more time outside have a higher risk of becoming infected. Older adults and people with weak immune systems may develop more severe illness.

Treatment

Specific treatment is lacking for many mosquito-borne diseases. Mild cases may improve on their own. Severe illness, including malaria, can be life-threatening and requires timely medical care.

How to Avoid Contact with Bird Flu

Bird flu mostly affects wild birds.
It has also infected poultry and a variety of animals.

In nature

Stay away from wild birds and wildlife and don't touch, hand feed, or handle them.

Preparing food

Cook all foods made with poultry, meat, and eggs thoroughly.

Drink milk and eat milk products that are pasteurized.

Outside with your pet

Contact your veterinarian if you think your pet is sick.

Keep your pets away from sick or dead birds and other wildlife.

At animal exhibits

Wash hands with soap and water after touching animals or being around them.

Scan to report a sick or dead bird:

Scan for more information:

Stay Up to Date and Vaccinate

Getting your children vaccinated on time by following the Centers for Disease Control and Prevention (CDC) Recommended Immunization Schedule can help them stay healthy as they grow older.

Get Early Protection

Vaccinate before your child is exposed to dangerous diseases; waiting until school begins, may not allow enough time for vaccines to work.

Attend School and Activities without Delay

Vaccinate your children on time so they can start the new school year, join a sports team or group activities, and travel without delay.

Avoid Disease-Related Complications

Some diseases could lead to serious complications (e.g., Meningitis could lead to hearing loss, COVID-19 could lead to trouble breathing). Getting vaccinated can help prevent this from happening.

Prevent the Spread of Illness

Getting vaccinated can help prevent the spread of illness and protect friends, family and other community members, especially those who are too young to be vaccinated or those who are at high-risk for disease.

Stay Protected

The CDC immunization schedule is carefully designed to provide protection at just the right time. Some vaccines need to be given more than once so your child can remain healthy.

Tips for Staying Up to Date

Schedule well-child visits and follow the CDC recommended vaccine schedule when making your child's vaccination appointments.¹

Keep track of your children's vaccines by enrolling in the New Jersey Immunization Information Service (NJiIS).²

If you or someone you know needs assistance with paying for children's vaccinations, visit the Vaccines for Children Program (VFC) website to see if you qualify.³

To avoid delays in starting school, preschool or daycare, know what your school and state guidelines are regarding vaccinations.⁴

Be a good example for your children by making sure you and other adult family members are also up to date with their vaccinations.

HPV VACCINE: Information for Parents

As parents, you do everything you can to protect your children's health now and for the future. Did you know that you can protect them from several types of cancer with HPV vaccination?

What is human papillomavirus (HPV)?

Human papillomavirus (pap-ah-LO-mah-VYE-rus), or HPV, is a group of common viruses that affect both boys and girls. HPV can cause anal and mouth/throat cancers. It can also cause cancer in the cervix, vulva, and vagina in women; and cancer of the penis in men. Different types of HPV can cause genital warts.

Is there a cure?

There is no cure for HPV, but there are ways to treat the health problems caused by HPV such as genital warts and certain cancers. Most infections will clear on their own, but there is no way to know which people will develop cancer or other health problems. **Prevention is better than treatment.**

Is HPV vaccine safe?

The vaccine is very safe. Side effects are generally mild and may include a sore arm, fever, and headache.

Who should get HPV vaccine?

The vaccine is recommended for boys and girls at ages 11 to 12-years-old because:

- ❖ The immune response to the HPV vaccine is better in preteens.
- ❖ Your child should be completely vaccinated before they are exposed to the virus.

Catch-up vaccination can be given at ages 13 through 26.* The most important thing is for all preteens to complete the HPV vaccine series. Teens and young adults who haven't started or finished the HPV vaccine series should make an appointment today to get vaccinated.

Pregnant women and anyone who has ever had a life-threatening allergic reaction to any component of the vaccine or to a previous dose should not receive the vaccine.

* Some adults ages 27 through 45 may decide to get the HPV vaccine based on discussion with their doctor if they were not adequately vaccinated when they were younger.

What are the symptoms?

Even though most people do not show any symptoms, HPV can still be spread through contact during any type of sexual activity with an infected person.

Most people will be infected at some point in their lives. HPV infection is most common during the late teens and early 20s.

- ❖ About **79 million** Americans are currently infected with HPV.
- ❖ About **14 million** people become infected each year.

How can HPV be prevented?

HPV vaccination is a series of shots given over several months. Completing the vaccination series is important to ensure maximum protection against cancers caused by HPV infection. **Over 90% of cancers caused by HPV are preventable through HPV vaccination.** It also protects against the HPV types that cause most genital warts.

What if we can't afford the vaccine?

Families who need help paying for vaccines should ask their healthcare provider about the Vaccines for Children (VFC) program. The VFC program provides vaccines to uninsured and underinsured children younger than 19 years old. Parents may have to pay administration and office visit fees. **For more information, contact the NJ VFC at (609) 826-4862.**

Where can I get more information?

- ❖ Your healthcare provider
- ❖ New Jersey Department of Health
www.nj.gov/health/cd/vpdp.shtml
- ❖ Centers for Disease Control and Prevention
www.cdc.gov/hpv
- ❖ Vaccines for Children (VFC) Program

No Fear

Just Results

Test with **PRIDE**

Live with **CONFIDENCE**

Take charge of your well-being.
It's okay to ask for an STI test.
You deserve to know.

Plan

Look for local clinics, health centers, or health care providers that offer STI testing services. Some offer **FREE** testing!

You can also explore online platforms that provide at-home STI/HIV testing kits.

Start the conversation with your health care provider today.

Get tested

The testing process may involve:

- Blood tests
- Urine samples
- Swabs of genital, oral, or rectal areas
- Physical examination

Getting tested for STIs is one of the most important things you can do to protect your health.

Know your status

If your test results are positive for an STI, follow up with your health care provider for further evaluation, treatment, and counseling. It's essential to follow the recommended treatment plan and stop the spread.

Protect yourself and your partner.

WHO WE ARE

For 40 years, the New Jersey Department of Health Children's Oral Health Program has been delivering age-appropriate oral health education to school-aged children across the state.

We offer a wide range of oral health education programs and resources, including:

- School-based education activities conducted by experienced dental professionals.
- Resources for school nurses, such as the "Miles of Smiles" newsletter and the "Frannie Flossisaurus" and "Mr. Gross Mouth" loaner teaching kits.
- Oral health education for participants in the Women, Infants, and Children (WIC) Supplemental Food Program.
- Programs adapted for children with special needs.
- Oral health education for public health and social service professionals.
- Information for parents and guardians.
- Fluoride varnish applications.

CHILDREN'S ORAL HEALTH PROGRAM

Bringing Oral Health to Your School

New Jersey Department of Health
Division of Community Health Services

nj.gov/health/fhs/oral

Oral Health Teaching Kits for Children:

We offer teaching kits available for loan to schools, which include:

- Sample curricula
- Teaching puppets
- Books
- Visual aids

These kits are designed for school professionals to enhance oral health education.

All oral health programs are free of charge. To schedule a program, please contact the Regional Oral Health Coordinator (contact information is listed on the back of this brochure).

AGE-APPROPRIATE ORAL HEALTH EDUCATION:

Pre-K to 1st Grade:

- Brushing techniques
- Healthy food choices
- Importance of visiting the dentist

2nd to 3rd Grade:

- Understanding dental plaque
- Flossing techniques
- The role of sealants

4th to 5th Grade:

- Prevention of oral health injuries
- Braces care and maintenance
- Nutrition
- Sports guards

6th to 12th Grade:

- Oral effects of tobacco and vape use
- Oral cancer awareness
- Understanding gum (periodontal) disease

Parenting & Community Education:

- Oral health education & nutritional guidance
- Importance of regular dental visits
- Oral cancer awareness
- Maternal Oral Health
- Understanding gum (periodontal) disease
- Referral resources

The children's Oral health Program presentations are available in both in-person and virtual formats.

Programs cover a wide range of topics, including:

- Oral health and hygiene instruction.
- The importance of regular dental check-ups.
- Healthy food choices.
- The oral effects of tobacco and vape use.
- Vaping, smoking, and oral cancer.
- Prevention of oral injuries.
- Oral piercing and the importance of mouthguards.
- Gum (periodontal) disease.
- The systemic connection between oral and general health.

HOW DOES SMOKING AFFECT YOUR HEALTH?

Millennials and youth are not exempt from the health effects that are caused from smoking! Smoking causes cancer, heart disease, stroke, lung disease, diabetes, and chronic obstructive pulmonary disease, among so many other health effects.

HOW DOES USING OTHER TOBACCO PRODUCTS, SUCH AS VAPES AND E-CIGARETTES AFFECT YOUR HEALTH?

The epidemic of e-cigarettes and vaping associated lung injury sharply has increased. The Centers for Disease Control and Prevention has found that aerosolized nicotine, flavorants, chemicals, and other harmful particles of e-cigarettes could potentially affect a person's lungs and lead to lung damage.

VAPING MYTHS

MYTH: E-cigarettes are safe.

FACT: E-cigarettes are not currently approved by the FDA as a cessation smoking aid. Although, e-cigarettes may help adults who smoke if used as a complete substitute for all cigarettes and other smoked tobacco products. Dual use is not an effective way to reduce adverse health effects.

MYTH: Vaping helps people quit smoking

FACT: E-cigarettes are not currently approved by the FDA as a cessation smoking aid. Although, e-cigarettes may help adults who smoke if used as a complete substitute for all cigarettes and other smoked tobacco products. Dual use is not an effective way to reduce adverse health effects.

CHEMICALS FOUND IN E-CIGARETTES

- Nicotine
- Carcinogens
- Benzene
- Propylene glycol
- Volatile Organic Chemicals
- Flavoring such as diacetyl, a chemical linked to serious lung disease
- Heavy metals such as nickel, tin, and lead

HEALTH BENEFITS AFTER QUITTING INCLUDE

- 20 minutes= Your heart rate drops to a normal level.
- 12 to 24 hours=Carbon monoxide level in your blood drops to normal and risk of heart attack is significantly reduced.
- 1 to 9 months= Your coughing and shortness of breath decreases.
- 1 year= Your risk of heart disease is reduced by half of a smoker.
- 10 years=Your risk of dying from lung cancer is reduced by half of that of a smoker.

WHAT CAN YOU DO TO LET GO OF TOBACCO?

Take control of your health and don't let Big Tobacco Companies take control of you.

Cessation Resources:

tobaccofreenj.com/quit-smoking
