Intern Success Is Our Passion

Information Session and Application Period Open Now

Project SEARCH is an extraordinary employment and training opportunity for young adults with different abilities.

The Project SEARCH model involves an extensive period of skills training and career exploration, innovative adaptations, long-term job coaching, and continuous feedback from instructors, skills trainers, and business mentors. As a result, Project SEARCH helps young adults with disabilities develop the habits and mindsets needed to make them successful for the duration of their working life.

Beyond hard and soft skills acquisition, Interns learn the expectations of employers in both the recruitment process and in the workplace. Once Interns complete the program, they receive effective follow-along services to enter and advance in the workforce.
